SNOW GROOMING

MÜLLER FAHRZEUGTECHNIK

INNOVATIVE
RELIABLE

The **Müller Fahrzeugtechnik GmbH** is a modern-oriented familiy company, focused on developing, production and distribution of cross-country-tillers and snow grooming equipment.

Innovative solutions are helping our customers to solve their tasks and requirements in the range of snow processing cost effectively and with the highest qualitiy possible.

The **mueller** cross-country tiller for tractors and agricultural vehicles gives our customers new possibilities to create cross-country trails, toboggan runs and winter hiking trails in addition to conventional preparation.

Due to the simple and flexible handling, these can be used among others in the range of event management in cities, golf courses and racecourses.

In addition to the cross-country tiller serves the unique **mueller** snow grooming blade.
It´s conception with 8-way or 12-way functions creates optimized requirements for shunting large snow-quantities or artificial snow deposits

mueller
it´s time to change

Snow groomer training

course duration (2 days)

with exam and certificate

YOUR SECURITY IS OUR REQUEST

Spare part - tiller shaft

- for all common snow groomer
- compatible with existing tiller
- optimized tiller shaft teeth
- fine balanced and sealed

Cross country track setting plate

for all common snow groomer

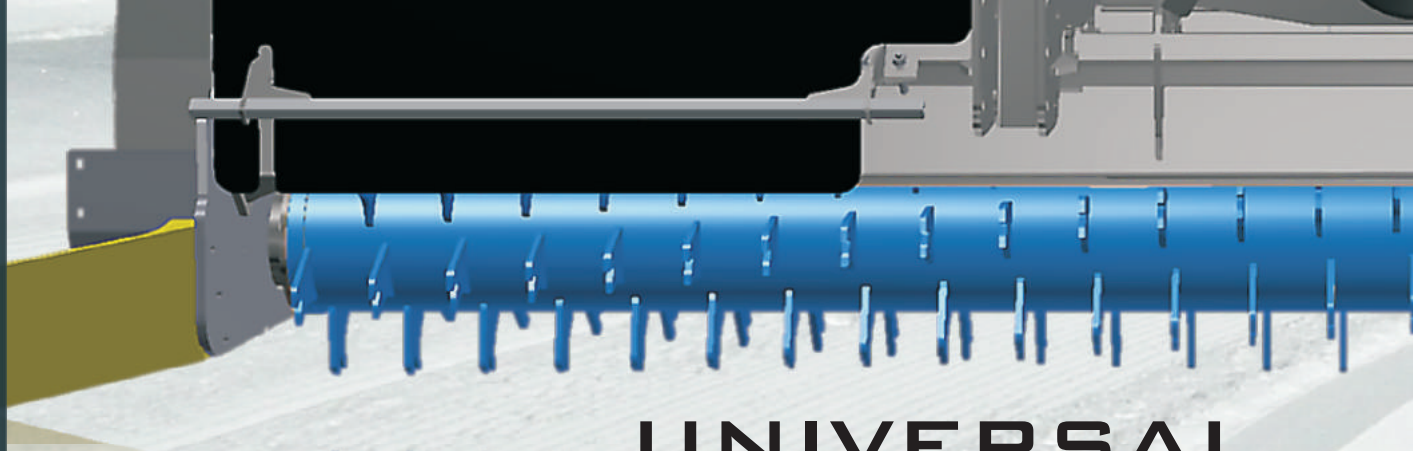
differnent types of plates

- Track setting plate SP30
- Track setting plate SP40

pre cutter available in standard version or version for less snow

SNOW GROOMER

TILLER LF MECHANICAL



UNIVERSAL

mueller

POWERFUL

The **mueller cross-country tiller LF** for tractors impresses with ist unbeatable price-performance ratio and is a cost effective alternative to conventional snow grooming machines.

LF TILLER FOR TRACTORS with mechanical drive for processing of:

- scating and classic cross-country ski trails
- toboggan runs
- winter hiking trails
- parking areas

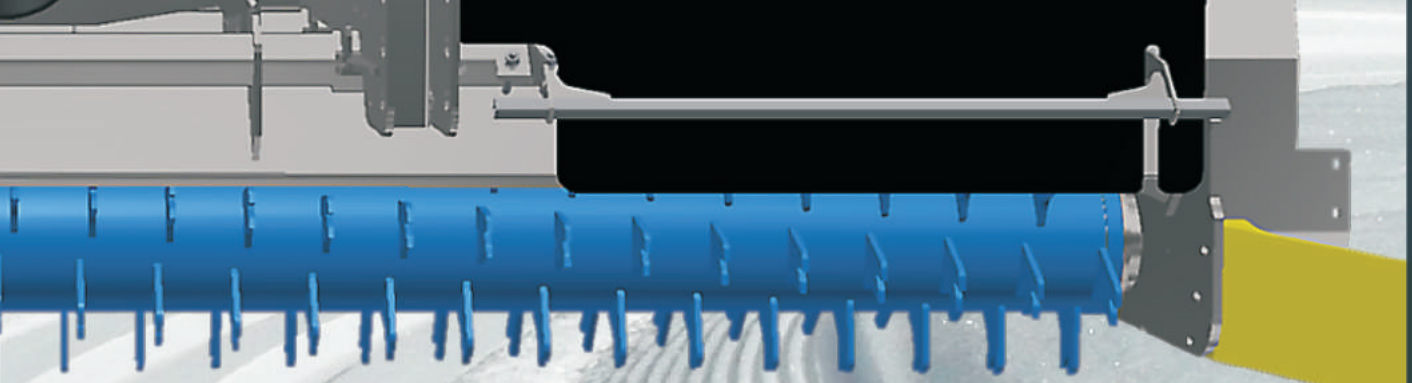
BENEFITS:

- low investment and operating costs
- soil-conserving preparation
- street rides possible

TECHNICAL DATA:

Typ	Tiller shaft	Working width	3-point	Tractor
LF120M	120cm (47")	180cm (71")	Cat. 1/2	40 HP
LF160M	160cm (63")	220cm (87")	Cat. 1/2	45 HP
LF200M	200cm (78")	260cm (102")	Cat. 2	50 HP
LF240M	240cm (95")	300cm (119")	Cat. 2/3	75 HP
LF280M	280cm (110")	340cm (134")	Cat. 2/3	90 HP
LF320M	320cm (126")	390cm (154")	Cat. 3	120 HP

DRIVE: PTO-shaft 540/540E/1000 rpm



COMPACT VERSATILE

The **mueller tiller LF** for municipal vehicles is characterized by it´s hydraulic drive as a versatile solution for winter hiking trails and small places.

LF TILLER FOR VEHICLES with hydraulic drive for processing of:
- toboggan runs
- winter hiking trails
- parking areas

BENEFITS:
- prevents formation of ice on winter hiking trails
- no use of grit (gravel, etc.) necessary
- certification of winter hiking trails possible

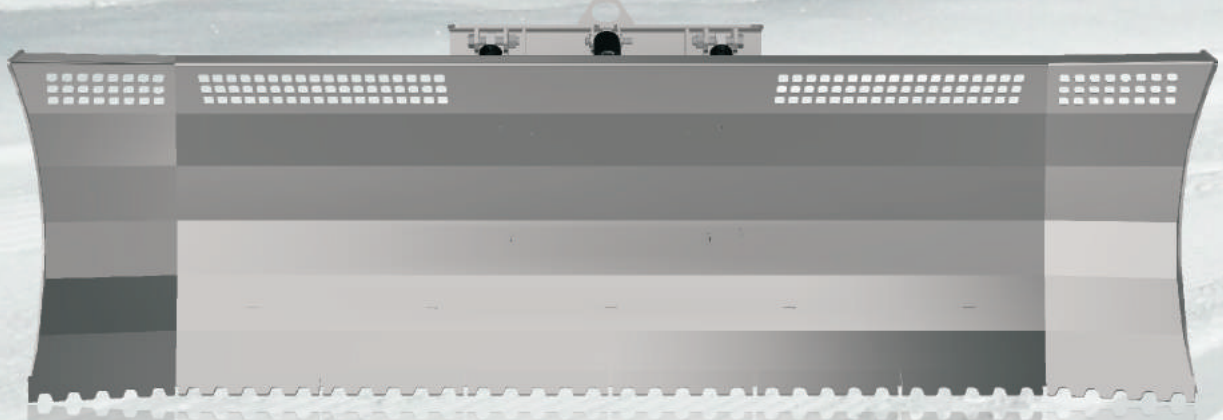
TECHNICAL DATA:

Typ	Tiller shaft	Working width	3-point	Tractor
LF120H	120cm (47")	180cm (71")	Cat. 1/2	45 HP
LF160H	160cm (63")	220cm (87")	Cat. 1/2	50 HP
LF200H	200cm (78")	260cm (102")	Cat. 2	60 HP
LF240H	240cm (95")	300cm (119")	Cat. 2/3	90 HP

DRIVE: hydraulic pump up to 350 bar at 55 L/min or 90 L/min oil flow rate

TILLER LF HYDRAULIC

FRONT BLADE RS

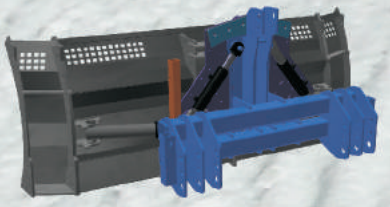


FLEXIBLE

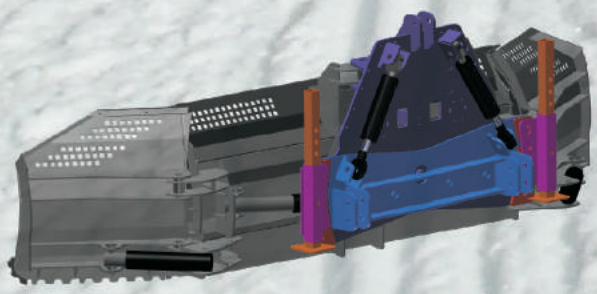
mueller

UNIQUE

8-WAY-BLADE



12-WAY-BLADE



The **mueller front blade RS** is unique in its movement functions and its universal application possibilities.

RS FRONT BLADE FOR TRACTORS
for processing of:
- skating and classic cross-country ski trails
- toboggan runs, ski lifts for kids

BENEFITS:
- ideal for the distribution of snow depots
- compensation of transverse grooves in toboggan runs
- easy to attache and remove from tractor

8-WAY-BLADE-:
- 8-Way-Blade RS8
- Width 150/190/210/240 cm (H 70 cm)
- Category Cat. 1/2 (ISO 8759-1)

12-WAY-BLADE:
- 12-Way-Blade RS12
- Width 280/320/360/400 cm (H 70 cm)
- Category Cat. 2 (ISO 8759-1)

SCATHING MANEUVERABLE

FRONT BLADE RS

8-WAY-BLADE WITH RIGID WINGS:

Typ	Width	with Wings	3-Point	Tractor
RS8-150	150cm (59")	190cm (75")	Cat. 1/2	40 HP
RS8-190	190cm (75")	230cm (90")	Cat. 1/2	45 HP
RS8-210	210cm (82")	250cm (98")	Cat. 2	50 HP
RS8-240	240cm (94")	280cm (110")	Cat. 2	75 HP

12-WAY-BLADE WITH HYDRAULIC WINGS:

Typ	closed	open	3-Point	Tractor
RS12-280	250cm (98")	280cm (110")	Cat. 2	75 HP
RS12-320	280cm (110")	320cm (126")	Cat. 2	100 HP
RS12-360	320cm (126")	360cm (142")	Cat. 2	140 HP
RS12-400	360cm (142")	400cm (157")	Cat. 2	160 HP

ACCESSORIES TILLER LF

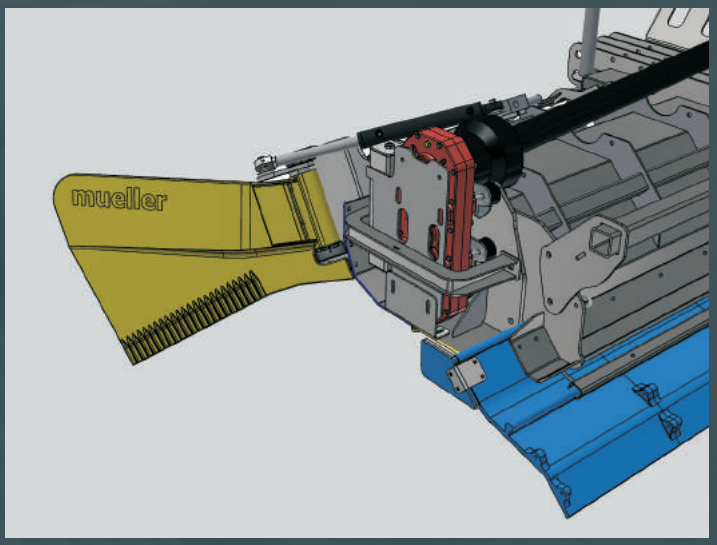
SIDE WINGS SF

for new and existing mueller tillers

Side wing kit consisting of

- hydraulically moveable side wings
- assembly plate left / right
- safety valve on the hydraulic cylinder

The mueller side wing for improved and optimized ski slopes



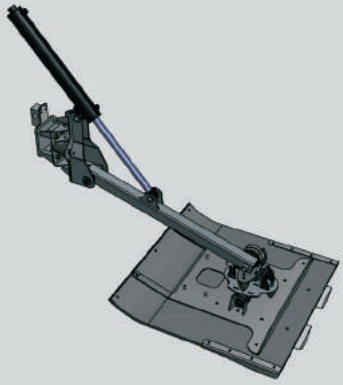
TACK SETTING KIT SP

for new and existing mueller tillers

Cross-country track kit consisting of

- hydraulically lowerable track plate
- track setting plate SP30 or SP40
- DVB valve for constant contact pressure

The mueller track setting kit SP for a perfect track in all snow conditions



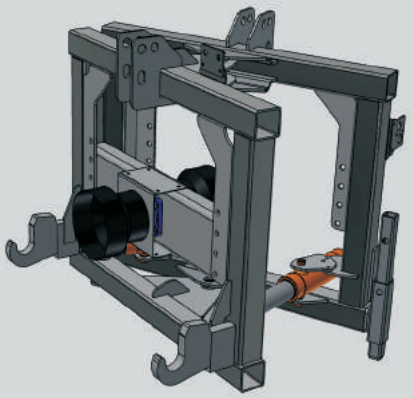
PIVOT ADAPTER SB

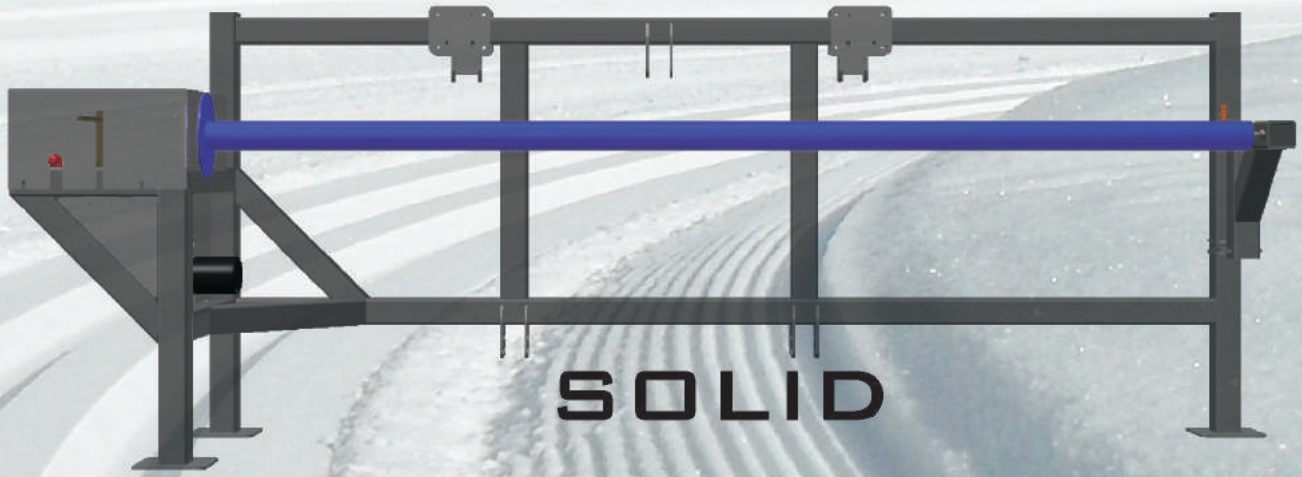
for mueller tillers LF 160/200/240/280/320

Types of Pivot adapters

- SB2 Cat. 2 adapter
- SB3 Cat. 3 adapter
- with or without central bearing

Lock, swing or float the mueller ipvot adapter always takes care of the perfect track in curves





SOLID
UNBEATABLE

mueller

The **SKI NET REWINDER** simplifies rolling up safety nets in the ski areas.

BENEFITS:
- connection to snow groomers at front blade
- connection to tractors by three point hook
- roll-up width: 2900 mm
- easy of use - roll up/roll out/stop
- roll up speed adjustable
- emergency stop safety valve
- massive construction with 80mm square tube

DRIVE:
- hydraulic motor with gearbox
- hydraulic quick couppling BG3 (size 3) for pressure and leak oil hose
- max. hydraulik pressure 180 bar at 30 L/min oil flow

SKI NET REWINDER

TRACTOR TRACKS

SoucyTrack

HEAVY DUTY
UNBREAKABLE

TRACTOR TRACKS

TRACK BRACKETS

The **Soucy Track tractor tracks** impresses with maximum traction and simultaneous soil protection, longevity and an optimal cost-benefit ratio.

TRACKS FOR TRACTORS for processing:
- Skating / Classic trails
- Toboggan runs, children's ski lifts

ADVANTAGES:
- enormous thrust for the distribution of snow and artificial snow repositories
- Soil protection with little snow
- Year-round operation and road driving possible

TRACKS FOR COMMUNAL VEHICLES for processing:
- Winter hiking trails
- Narrow trails in the forest area

ADVANTAGES:
- Inaccessible areas accessible
- Higher stability
- Improved traction

ALDO ANNOVI

THOROUGH
CUSTOMIZABLE

The winter service technology by **Aldo Annovi** impresses with its quality and robust design. A thorough snow removal is the measure of all things in the harsh winter service routine.

Aldo Annovi with his many years of experience acts as a reliable and competent partner.

Numerous variants of the products snow blade and snow blower offer each customer an optimal solution for his needs.

ADVANTAGES:
- universally suitable for different vehicles
- quick and easy to assemble
- innovative design with modern features
- Attachment to front linkage or municipal plate
- CE certified

mueller and Aldo Annovi - a strong team
